

Vijay Kumar

Sr. AI + Backend Developer | Cloud & Platform Specialist | Java, Python, LangChain, Spring Boot

Email: vijayk.tech97@gmail.com | Phone: +44 7424 067640

Professional Summary

Versatile **AI + Backend Developer** with **7+ years of experience** delivering end-to-end enterprise solutions across **cloud platforms (AWS, GCP, Azure)**. Strong hands-on expertise in **Java (Spring Boot), Python**, and **microservices/SaaS architectures**, with proven ability to integrate **LLMs, LangChain, and Retrieval-Augmented Generation (RAG)** pipelines into scalable backend platforms. Skilled at building **API-first applications**, implementing **security best practices**, and applying **observability frameworks** to ensure performance and reliability. Adept at working in **Agile environments**, with cross-functional collaboration across DevOps, AI/ML, and product teams.

Core Skills

- **Backend Development:** Java (Spring Boot, JUnit 5, Mockito), Python, REST APIs, SaaS Platforms, Microservices, Swagger
 - **AI/LLM Development:** LangChain, RAG pipelines, Prompt Engineering, OpenAI APIs, Agent-based architectures, MCP servers
 - **Cloud Platforms:** AWS (EC2, Lambda, API Gateway, RDS, IAM, VPC, S3), GCP (Cloud Run, BigQuery, GKE, Cloud Functions), Azure
 - **DevOps & IaC:** Docker, Kubernetes, Terraform, GitHub Actions, Jenkins, GitLab CI/CD, IaC (Terraform, Bicep)
 - **Observability & Security:** Grafana, Prometheus, ELK Stack, CloudWatch, OpenTelemetry, distributed tracing, IAM, OAuth, OIDC, SOC2 practices
 - **Data & Storage:** PostgreSQL, MySQL, MongoDB, DynamoDB, Elasticsearch, BigQuery
 - **Agile & SDLC:** Scrum, CI/CD automation, TestContainers, Domain-Driven Design (DDD), Low-code/no-code integration
-

Professional Experience

AI + Backend Developer | ORN.ai | Remote, UK

Feb 2024 – Present

- Built **LLM-powered microservices** using **LangChain + Python**, enabling intelligent search and RAG-based content workflows for AI-driven products.
- Developed and deployed **Spring Boot APIs** for backend services, integrated with **Postgres, MongoDB, and Elasticsearch**.
- Designed **GCP-based ETL + AI pipelines** on **Cloud Run, BigQuery, Cloud Storage**, supporting ML workloads.
- Automated deployments with **Terraform & Cloud Build**, ensuring consistent infra across environments.
- Enhanced system reliability by implementing **Prometheus/Grafana dashboards** and distributed tracing with **OpenTelemetry**.
- Applied **OAuth, OIDC, IAM policies, and API security** for compliance-ready applications.
- **Collaborated with AI/ML engineers** to optimize model integration workflows into production SaaS platforms.

Backend & Cloud Engineer | Taylor & Francis | UK

Sept 2022 – Dec 2023

- Built **API-first microservices** with **Spring Boot + Python**, enabling data ingestion pipelines across Azure & GCP.
- Designed **real-time analytics pipelines** using Azure Data Factory + BigQuery.
- Integrated **Elasticsearch and Postgres** into backend services for scalable querying and search.
- Automated CI/CD pipelines with **GitHub Actions**, reducing release incidents by 40%.
- Deployed apps on **AKS & GKE**, secured with RBAC, IAM, and API gateways.
- Partnered with product teams to deliver **SaaS-style publishing workflows** and improved **observability with Grafana + ELK**.

Backend/DevOps Engineer | Virtusa | Hyderabad, India

Nov 2019 – Sept 2022

- Developed **microservices in Spring Boot + Python**, deployed on **AWS/GCP**.
- Built **Terraform templates** for hybrid cloud workloads, reducing infra setup by 70%.
- Automated pipelines in **Jenkins**, accelerating release cycles by 50%.
- Implemented **AI integration prototypes** with NLP models for enterprise search and chatbots.
- Applied **distributed logging/monitoring (ELK + Stackdriver)** for production debugging.

DevOps Engineer | Wells Fargo | Hyderabad, India

Mar 2018 – Nov 2019

- **Migrated legacy banking applications into Docker containers**, orchestrated with **Kubernetes (EKS & on-prem clusters)**.
- **Built resilient CI/CD pipelines in Jenkins** for critical banking systems, ensuring zero-downtime deployments.
- **Automated infrastructure provisioning with Terraform & ARM templates**, reducing setup effort by 50%.
- **Enhanced observability using Splunk + ELK + Kibana**, cutting troubleshooting time by 40%.
- **Hardened platform security with IAM, RBAC, VPC, and NSG policies**, ensuring compliance for financial workloads.
- **Collaborated with cross-functional teams (DBAs, security engineers, developers)** under Agile methodology to deliver stable, compliant platforms.

Education

- **B.Tech in Civil Engineering** | Veltech University, 2018

Certifications

- **AWS Certified DevOps Engineer – Professional**
- Google Cloud Professional DevOps Engineer
- Microsoft Certified: Azure Data Engineer Associate
- HashiCorp Certified Terraform Associate

Key Achievements

- **Reduced deployment times by 40%** via CI/CD re-architecture with GitHub Actions.
- **Improved system reliability by 60%** through observability & incident response.
- **Cut provisioning time by 70%** using Terraform automation.
- **Lowered cloud costs by 25%** via workload optimization.
